Sir:

Prior to the examination please amend the above identified application as follows:

In the Claims

Please amend Claim 30 as follows:

30. A power converter, comprising:

a first circuit converting an AC input voltage to a first predetermined DC output voltage;

a second circuit converting a DC input voltage to a second predetermined DC output voltage; and

an third circuit receiving said first and second predetermined DC voltages and, in response thereto, providing a selectable DC output voltage at a first output, wherein said selectable DC output voltage is established as a function a removable program module, the removable program module selectively establishing a resistor as a part of the third circuit.
